# ITALY EUROGRAVURE HEADQUARTER

---

Project realized by prefabbricati Cividini

**LOCATION**

ITALY\_TREVIGLIO (BG)

**CLIENT**

EUROGRAVURE

**DESIGNER**

CED INGEGNERIA SRL

**WORK DURATION**

14 MONTHS

**SECTOR**

INDUSTRIAL

Eurogravure plant in Treviglio is one of the world's biggest and most modern industrial complexes in the publishing industry.

Its whole surface consists of more than 50.000 square meters covered, with 45.000 square meters used as plant and 5.000 for offices, on a 200.000 square meters area. A majestic work that has required advanced and innovative solutions.

Project realized by prefabbricati Cividini

## WORKS EXECUTED

We performed the entire construction, from A to Z. The works designing underwent a careful evaluation: tight deadlines for carrying out the works, together with their complexity, required the implementation of several work fronts at the same time.

This meant carrying out and managing 4 different building sites for a sole project.

The success of this intervention lies in the ability to associate the development of construction site activities with the production and assembly of prefabricated structures.
